

Switches

All Deco® switches are supplied complete with requisite switch module(s). However, should local conditions dictate, the installer may customise a switch arrangement by substituting switch modules by means of a simple, single fixing screw.

A comprehensive range of available modules is illustrated in our dedicated Minigrid™ brochure section.

Unfurnished mounting plates can be ordered separately and furnished with whatever selection of switch modules may be required.

All Deco® switch plates are modular as standard, allowing you to create virtually any switch plate you require e.g. Two way switch next to an intermediate switch (shown above).
